Medical Specialties Distributors, LLC (MSD) and Definitive Homecare Solutions Announce Exclusive Alliance

Stoughton, Massachusetts and Columbus, Ohio, March 3, 2010 – Medical Specialties Distributors, LLC (MSD) and Definitive Homecare Solutions, Ltd. (DHS), the developers of CPR+ home infusion and specialty pharmacy software, today announced a 5-year alliance. Under the agreement, Definitive Homecare will collaborate with MSD to develop automation solutions, fully integrated within CPR+, across the entire supply chain for home infusion providers. These features will be fully available in CPR+.

“MSD is the logical choice to bring this new feature set to the home infusion market,” said Jeff Johnston, Co-Owner of Definitive Homecare Solutions. “MSD is the leading supplier of infusion products and is committed to the success of infusion providers by utilizing technology to bring time and cost savings solutions to their customers. MSD’s commitment is perfectly aligned with our mission and the continued enhancement of CPR+ for infusion and specialty pharmacy providers.”

MSD is the largest supplier of infusion related supplies and equipment to the home infusion market, and CPR+ is the most utilized patient and business management software among home infusion providers. The alliance seeks to capitalize on the strengths of both organizations to develop inventory and asset management that presents a seamless solution to these providers. DHS and MSD anticipate rolling out a host of new features by the middle of the year, which are expected to include MSD catalogue integration, automated intelligent ordering, price updates, barcode based receiving, patient home delivery, and asset tracking and management features.

“CPR+ is the clear leader among software solutions in the home infusion marketplace, and we are pleased to exclusively recommend CPR+ to MSD’s infusion and specialty pharmacy customers,” said Mike Ward, Senior Vice President of New Products and Technology Development of MSD. “With the enhanced offerings that we’re developing in conjunction with Definitive Homecare Solutions, our joint customers will have access to a host of supply chain and inventory management tools that will change the way infusion providers do business.”

In addition to the development commitments, the agreement will allow MSD to offer CPR+ to its customers at preferred pricing.
